Asbestos consultancy and management
limited,

Address: The lookout, 4 Bull Close Road,
Nottingham, NG7 2UL

Vision: The multi module risk assessment and management system

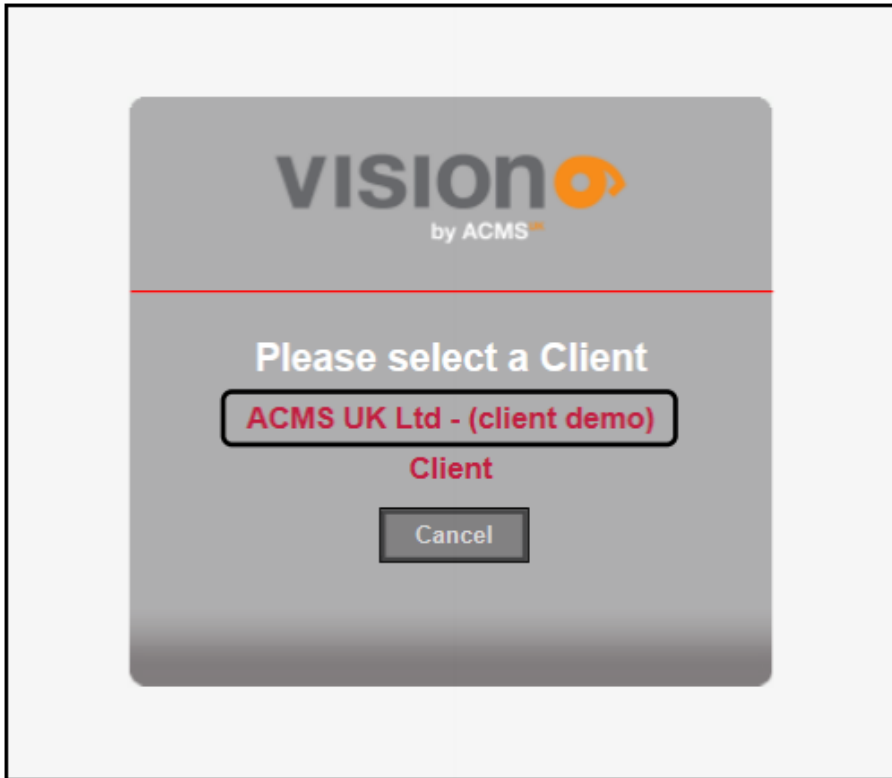

- Vision is a web based, modular software platform. Our Vision software allows you to manage your entire property compliance in one place... online. It has been designed to show where in your portfolio the risks lie for remedial works and gives secure access to your consultants. Distribute and manage your internal and external survey teams to keep your information up to date and compliant.
- Our exclusive focus is on providing risk management and compliance software that can be easily integrated into our client's organisations.
- Vision has been developed with industry leading clients, and includes a large range of modules covering all aspects of Health & Safety, Environment and compliance. These modules are configured to meet our client's precise business needs.
- The flexibility of Vision and its functionality has allowed us to deliver measurable benefits for a diverse range of global clients and industries, where managing compliance efficiency is business critical and embedded in the organizational culture.
- We recognize that a solution in itself has no inherent value unless it solves problems or delivers results. Therefore the solutions we provide are as a result of extensive consultation to ensure our software products truly meets the needs of our clients.
- Vision works in partnership with our clients to review business risk, configure and prioritise appropriate compliance actions to meet individual client requirements. This collaborative approach ensures business compliance risks are appropriately managed in accordance with current statues and guidance.
- The Vision software goal is to deliver solutions which can be rapidly introduced into a client's organization; are intuitive and easy to use; integrate seamlessly with the use of internal systems; and scale easily across new functionality, additional users and internal management structures
- In short, we consider Vision to be the most powerful, intuitive and user- friendly risk assessment management software available on the market.

Step 1: you need to go to the vision website, the link to the website is <https://primary.visionriskonline.com/>. A link to vision can be found on our website.

Ready to transform your risk management?

- COMPLIANCE SOFTWARE
- BESPOKE REPORTING
