

"Vision is a very user-friendly, client management tool which provides us with a quick overview of our asbestos management status, or allows us to view our asbestos survey data in detail, whether on a desktop, PC or mobile hand held device. Vision helps us to manage our asbestos with greater efficiency and is a great tool for communicating our asbestos status at our regular compliance meetings."

Richard Hatfield
Building Surveyor,
Cranfield University

As users of the Vision software system, Anglia Ruskin University have now installed Vision-tags. "We now manage and maintain our emergency lighting across the campus via the Vision-tag. Our Maintenance Department simply scan the tag using a mobile device and are able to view and/or edit the data presented at site level. It gives us a comprehensive and immediate overview and with the uploading of any and all documentation. Maintenance are always in complete control of these assets and their operational status."

Christopher Willis
Head of Asset Management,
Anglia Ruskin University

"Transitioning our store's weekly fire audits was so successful that we transferred all our Health and Safety audits and inspections onto the same platform. Other departments have also started to use the system. This has resulted in being able to get a broader view of data regarding a site as we can share this cross functionally. These vary on content and requirements but the system is flexible enough to meet all our requirements."

Katherine Stewart
Group Health and Safety Manager,
New Look Retailers

VISION PRO SOFTWARE

Vision Pro Software has been created by industry experts, developed by software specialists and continually evolved by our clients. We recognise that each client, whether they are in the same sector or not, is unique, so we've made the system flexible and customisable to suit each individual client's needs.

With measurable results, **Vision Pro** will save you time and money and increase your organisation's productivity and efficiency.

WHY CHOOSE VISION PRO?

Property/Estate Management

Vision Pro delivers real-time data in a structured, centralised database that gives your business full visibility of all property compliance, assets, audits and maintenance processes.

Site Management

With **Vision Pro**, you can identify, view and edit any aspect of your organisation's management processes at site level to deliver business intelligence for more effective business management.

Workplace Management

Vision Pro delivers centralised and secure documents, drawings, CAD plans, images and video footage shared storage to ensure those in your organisation are always in the know.

Asset & Maintenance Management

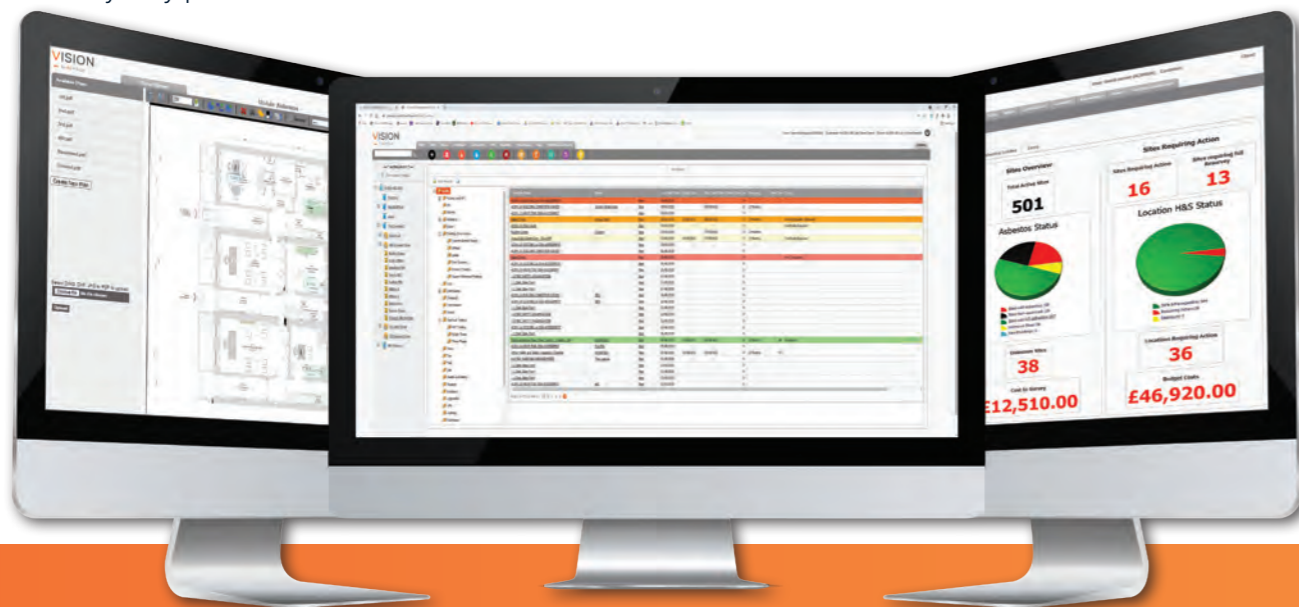

Vision Pro and **Vision-tags** allow every organisation to manage its assets in order to operate effectively. Identify, track, monitor and assess your assets to deliver growth and manage productivity efficiently.

Integrated Management System

Vision Pro puts you in control of all your policies, procedures and processes to deliver 'best practice'. Gain and retain company accreditation to give your organisation the competitive edge.

Sustainability

Vision Pro gives you the opportunity to manage, monitor, improve and balance your organisation's sustainability and commercial goals. The software helps your organisation rise to the challenge of every-day practices.

HERE ARE JUST A FEW OF THE FEATURES & BENEFITS OF VISION PRO . . .

| | | | |
|--|---------------------------------|---|---|
| Increase productivity & efficiencies | Cost & resource savings | Instant Compliance visibility with Portfolio Dashboards | Business Intelligence & compliance, as standard |
| Email alerts for overdue compliance & audits | Secure, cloud-base system | Identify & prioritise urgent works | Mobile Apps for on-site data editing |
| Intuitive & integrated auditing | Customisable system permissions | Unlimited licences for users/contractors | NFC/RFID technology (Vision-tags) |
| Upload & print plans, procedures & reports | Fully customisable reporting | Upload drawings, images & video | Edit CAD drawings in-situ (Asbestos) |

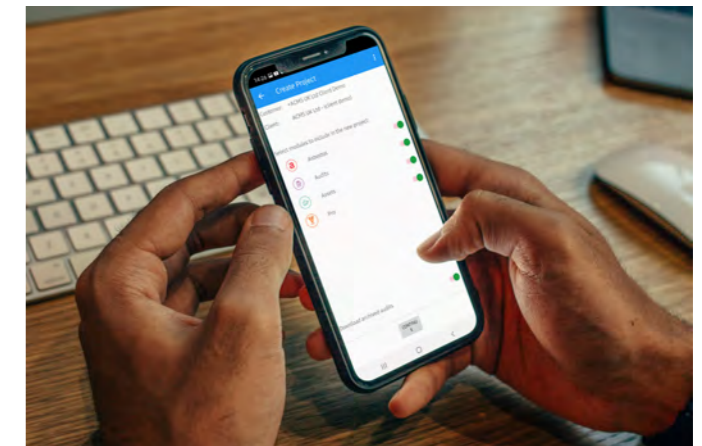

SO, WHICH SOFTWARE MANAGEMENT SOLUTION IS RIGHT FOR YOU?

THE VISION MOBILE APP

. . . delivering flexibility, compliance and total management at the touch of a button! Used in conjunction with the **Vision Pro Software**, the **Vision Mobile App** manages:

- Images
 - Video footage
 - Certificates
 - Schedules
 - Documents
 - And most important of all . . . **LIVE DATA**
- For
- Asbestos
 - Audits
 - Assets

VISION - TAGS

Now you can tag **ANY** asset **ANYWHERE**

Forget barcodes and QR codes, tagging is the way forward! Unobtrusive, easy to use, long lifespan with numerous styles to fit any size or shape of equipment or machinery.

Vision - tags are now fully integrated into both the **Vision Pro Software** and the **Vision Mobile Apps** to enable you to scan, read, register, access and update live data at site level. The **Vision - tag** can be used for assets, audits (from fire to legionella to building condition and maintenance) and managing asbestos.
